

Alice in Wonderland: Drink Me Potion

Hello fandom community! Bare with me because this is my first recipe tutorial! I am a little nervous that I am going to do bad and people won't like it. So what I'm doing is an Alice in Wonderland: Drink Me Potion of my own concoction, so a Wonderland Potion, I guess. I got the idea of Pinterest but never looked at the recipe because I had an idea of my own.

Heres what you need to do:

First off you need a glass bottle to put everything in once its done. This one was 12oz and I had it laying around the apartment from I drink I previously brought, so I though, why not reuse it! It was this:

I had this lying around,

nothing
fancy

Ingredients for this
delicious drink!

So, what I used for the ingredients are above, I'll list them below and potential ideas for what you could use instead:

- La Croix sparkling water (You could also use RedBull also to give it a kick, or an energy drink, or another type of soda water) I choose the ras-cranberry flavor because it would go good with the flavor of syrup I choose
- Torani's Raspberry Flavoring (You can change the flavoring if you wish)
- A few drops of food coloring, I used blue, but again you can use any color!

I then placed a funnel on top of my bottle for it wouldn't spill. Then added the Torani syrup and food dye. I want to show you guys what happened with the food dye! It was awesome!

Outer space look, right?

After that happened, I stuck a straw in there and stirred and got this as the final product:

It is
wonderfully
delicious :)

Here is the label I made:
Feel free to use it and pin it!

I hope you guys enjoyed this! I enjoyed writing it!
